Species Migration Barrier

Mapped stream blockage codes are as follows:
First letter code is 'I' for Impassable to all species or 'P' for Passable to designated species.
Blockage type code letters are described below.

B = Beaver Dam	O = Ford
C = Cascades/Gradient/Velocity	S = Screens
CU = Culvert	SS = Soil Slump
D = Dam(s)	T = Temperature
F = Falls	U = Unknown
G = Gate	W = Wier
I = Insufficient Flow	WD = Water Diversion
L = Log Jam

Notes on Salmonid maps:

Each Salmonid species stock status is represented using WDFW linear event tables and WDFW routed hydro line work.

Each Salmonid species has its own map based on WRIA area.

Barriers (to upstream migration) and Hatcheries/Facilities are shown on these maps by species coding.

Please refer to Washington Dept. of Fish & Wildlife (WDFW) website www.wa.gov/wdfw/fish/sassi/intro.htm or contact Cynthia Burns: burnscblb@dfw.wa.gov for more information about Salmon/stream status.

Endangered Species Act (ESA) listing status for Federal and/or State is included in RED text for each map where relevant.
